SHILPEE KUMARI

Automation QA Engineer (Selenium | Java | Playwright | TypeScript) — 5+ Years of Experience

er.shilpeekumari@gmail.com | +91-6202661448 | Notice Period: Immediate Joiner
LinkedIn: linkedin.com/in/shilpeekumari | GitHub: github.com/ershilpee

PROFESSIONAL SUMMARY

Automation QA Engineer with 5+ years of experience in Java-based test automation using Selenium WebDriver, TestNG and JUnit on web and data-driven applications. Focused on building frameworks that are easy to maintain, using the Page Object Model, dynamic XPath and modular design to cut duplicate scripts and keep tests stable. Solid background in manual and regression testing, SQL validation and defect tracking (Jira, Xray) in Agile/Scrum teams, with a record of turning manual scenarios into automated suites that run in CI and shorten test cycles. Recently completed structured training in Playwright with TypeScript, covering UI automation, BasePage/POM framework setup, API testing and GitHub Actions. Available to join immediately.

KEY SKILLS

- **Test Automation:** Selenium WebDriver, TestNG, JUnit, Java; Playwright with TypeScript
- **Playwright & TypeScript:** Frames, alerts, new tab/window handling, shadow DOM, CSS and XPath locators, scrolling, screenshots, BasePage and Page Object Model, framework folder structure and troubleshooting
- **API Testing:** API automation with Playwright (request handling and response validation)
- **Framework Design:** Page Object Model (POM), Modular Test Design, Dynamic XPath Locators, Framework Maintainability and Stability
- **Testing Types:** Manual, Regression, Functional, Integration, System and UI Testing
- **Backend & Data Validation:** SQL Testing (Joins, Indexing, Stored Procedures), Oracle, Snowflake, Toad, ETL / Data Pipeline Validation
- **CI / Agile:** GitHub Actions, CI Workflow Integration, Agile/Scrum Ceremonies (Sprint Planning, Stand-ups, Retrospectives, Backlog Grooming)
- **Defect & Test Management:** Jira, Xray, Test Plans, Test Cases, Traceability Matrices, Peer Reviews
- **Tools & Version Control:** Git, GitHub, Maven, IntelliJ, VS Code, Putty, WinSCP, Airflow, Autosys, UNIX Shell
- **Other:** Applied Generative AI concepts to enhance test automation productivity; introductory knowledge of AI Agents and RAG
- **Currently Learning:** Allure / HTML / Extent Reporting

PROFESSIONAL EXPERIENCE

Fidelity Investments — Software Development Engineer in Test (SDET) **April 2022 – November 2024**

Project: Husky | Team Size: 9 | Java, Selenium, JUnit, TestNG, Oracle SQL, IntelliJ, Jira, Xray, Snowflake, Airflow

- Built and maintained Java-based UI test automation using Selenium, applying the Page Object Model and modular design patterns to improve framework maintainability and reduce script duplication.
- Used dynamic XPath locators to handle complex and frequently changing UI elements, improving automation script stability.
- Converted manual ETL and functional test scenarios into automated tests and integrated them into CI workflows, expanding regression coverage.
- Wrote test plans and traceability matrices that mapped 100% of business requirements to validated test cases.
- Designed and ran manual and automated test cases aligned with sprint goals, working within a 9-member cross-functional team.
- Performed backend/SQL validation across raw, curated, and reporting layers — including joins, indexing, and stored procedures — plus source-to-target reconciliation to confirm data accuracy.
- Validated dashboards and reports by comparing backend database values with what the front end showed, so business teams could rely on the data.
- Logged and tracked defects in Xray with clear reproduction steps and impact notes; reviewed teammates' test plans for accuracy and completeness.
- Worked with developers and stakeholders in stand-ups, sprint planning and retrospectives to troubleshoot issues and agree on fixes.
- Used generative AI concepts to speed up test automation work and improve productivity.

Capgemini Technology Services India Limited — SDET **July 2019 – April 2022**

Client: UBS (Aug 2019 – May 2020) | Team Size: 8 | Java, Selenium, TestNG, WebDriver, JIRA, Toad, Informatica, Autosys

- Converted manual test cases into automated Selenium/Java scripts, improving regression coverage and reducing test cycle time.
- Designed and executed manual test cases for functional, integration, and system testing; validated each build prior to release.
- Improved automation framework stability and reported progress to stakeholders during sprint reviews.
- Partnered with business users to turn requirements into practical, testable test plans and cases.
- Worked with developers and product teams to find, document and resolve defects, helping reduce bugs found after release.
- Coordinated with offshore development and design teams to resolve issues faster and keep releases on schedule.
- Investigated failed jobs and file issues using Airflow, Autosys and UNIX tools, checking upstream and downstream dependencies.
- Built dashboards, test plans, scripts and test cases; joined daily stand-ups and weekly client calls to share progress and blockers.

SKILL UPGRADATION: PLAYWRIGHT + TYPESCRIPT (SELF-DIRECTED)

February 2026 – Present

- TypeScript fundamentals: classes, constructors, interfaces, polymorphism and OOP concepts.
- Playwright UI automation: new tab/window handling, frames, alerts, scrolling, screenshots, shadow DOM, CSS selectors and XPath locators.
- Framework design: folder structure, BasePage and Page Object Model, and framework troubleshooting.
- API testing with Playwright: sending requests and validating responses.
- Git version control and CI with GitHub Actions.
- Practised end-to-end test flows on an e-commerce use case using Playwright.
- Introduction to AI agents and RAG concepts.

EDUCATION

- B.Tech in Computer Science Engineering — LNCT Group of Colleges, Bhopal (2017), Aggregate: 75%

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified Associate, Java SE 8 Programmer
- Software Testing & Selenium WebDriver with Java and Oracle SQL — QSpider Bangalore
- Certified Gremlin Enterprise (Chaos Engineering)
- Awarded "Star of the Month" and "Rising Star"
